

Additional Exercises for Lab 7

(Decorator Pattern)

Once the solution has been reviewed, and for your self-assessment, add the following operations in the main function of the solution.

Make the modification 1 writing the normalised file to a.txt and also encrypt it to b.txt **using a single read** of the source file.

Perform all tasks required by the reference design on a single input file, private.txt, with a single call to copy.

Calculate an MD5-like Signature for a File

For our purposes, we will simulate this by summing its bytes.

Encrypt a file, calculate its signature before sending it over the internet, and then print its signature on the screen.
